

CHIRAD Moodle

Contributed by Peter
Tuesday, 01 May 2007

CHIRAD's new Moodle installation has been set up on our South African website - see www.chirad.co.za/moodle

At present, it is only in demonstration mode, but we will be developing it to offer resources and courses in health informatics globally. It will be used initially by students in Mthatha on the MSc in Health Informatics, who will be developing materials there during their mid-May study block.

Watch out for further developments.
